

Interesting Stuff:

I selected to go by the average data of every manufacturer as it's easier to determine the overall patterns among all the manufacturers instead of going through every cereal product.

- Nabisco seems to be the healthiest on average, it has lowest calories, highest protein, lowest fat.
- All Ralston Purina products have 25 vitamins
- It is easy to determine that General Mills and Kelloggs dominate the market, with the largest number of cereals

- Nabisco has lowest calories on average by a significant amount, the rest have the same calories

- Post has highest average protein, but all of them have roughly the same amount of protein

- Quaker Oats has the highest fat on average
- Nabisco has almost no fat on average

- Nabisco has significantly less Sodium than the rest of the cereals

- Nabisco has wayyyy more Fiber than the other brands

- All have roughly the same number of carbs

- Nabisco has lowest sugar by a large margin

- Nabisco has highest protein on average

Nabisco has lowest vitamins used on average

- As shown in graph above, all the different cereals in Ralston Purina contain the same number of vitamins. This is an interesting phenomena
